TESTIMONIAL

NAME : ARTHI.D

COURSE : B.Tech Degree

BRANCH / YEAR: Electronics and Communication Engineering /IV year

I am happy to state that Pondicherry Engineering College has been selected under RUSA Project of MHRD, Government of India. It is also stated by the college newsletter, that College got permission to upgrade into a Technical University through RUSA Project.

Implementation of RUSA project will surely help Pondicherry Engineering College to “attain higher levels of access, equity and excellence in higher education system with greater efficiency, transparency, accountability and responsiveness” Student can be motivated by great speakers. Student’s creative idea are encouraged and supported for future work.

In Pondicherry Engineering College under RUSA grants weightage is given towards improving facilities for female students and support services for disabled students and minority groups which is a very useful advantage from the student’s point of view. Level of teaching skills will be improved through learning and working in new and updating technologies.

I feel that by upgrading to University Status College will be able to provide more employment opportunities for students and able to learn and work with different sectors, student-to-faculty ratio and research citations per faculty member, alongside employer reputation and international diversity of staff and students.
